HTML

- **Introduction to HTML**
- **Basic HTML Elements**
- **HTML Attributes**
- **Links and Navigation**
- **Images and Multimedia**
- **Lists**
- **Tables**
- **Forms and Input**
- **Semantic elements in HTML**
- **HTML5 Features**

CSS

- **Introduction to CSS**
- **Selectors**
- **Colors, Backgrounds, and Borders**
- **Text Styling**
- **Box Model**
- **Display and Visibility**
- **Positioning**
- **Flexbox**
- **Grid Layout**
- **Transitions and Animations**
- **Responsive Design**
- **Advanced / Best Practices** (CSS variables, pseudo-classes, pseudo-elements)

JAVASCRIPT

- **Introduction to JavaScript**
- **Basics & Syntax**
- **Control Flow**
- **Functions**
- **Arrays**
- **Objects**
- **String & Number Methods**
- **DOM Manipulation**
- **Event Handling**
- **Advanced Functions**
- **ES6 Features**
- **Objects & Classes**
- **Asynchronous JS**
- **Error Handling**
- **Web APIs**
- **JSON (JavaScript Object Notation)**
- **Modules & Bundlers (ES Modules, CommonJS)**
- **Promises & Fetch API**
- **Error Objects & Custom Errors**

- **Browser Storage APIs (LocalStorage, SessionStorage)**

React JS

- **Introduction to React**
- **JSX (JavaScript XML)**
- **Components**
- **State Management (useState)**
- **Event Handling**
- **Conditional Rendering**
- **Lists and Keys**
- **Component Lifecycle**
- **useEffect Hook**
- **Forms in React**
- **React Router**
- **Context API**
- **Formik**
- **Advanced Hooks (useReducer, useRef, useMemo, useCallback, Custom Hooks)**
- **Styling in React API Integration (Fetch, Axios)**
- **State Management Libraries (Redux, Redux Toolkit)**
- **Performance Optimization**

Node JS

- **Introduction to Node.js**
- **Setting up Node.js Environment**
- **Node.js Modules (Built-in Modules)**
- **npm & Package Management**
- **Core Modules**
- **Global Objects**
- **HTTP Module (Creating Servers, Handling Requests & Responses)**
- **Express.js Basics (Routing, Middleware, Static Files)**
- **RESTful API Basics (GET, POST, PUT, DELETE)**
- **Template Engines (Pug, EJS)**

Express JS

- **Introduction to Express.js**
- **Setting up Express Environment**
- **Routing Basics**
- **Route Parameters & Query Strings**
- **Middleware**
- **Serving Static Files**
- **Handling Forms & JSON Data**
- **Template Engines**
- **Error Handling & 404 Pages**
- **RESTful APIs**
- **Integration with Databases**
- **Environment Variables & Config**
- **Basic Authentication**

- **Advanced Routing**
- **Advanced Middleware**
- **File Uploads**
- **Deployment**

MongoDB

- **Introduction to MongoDB**
- **Installing MongoDB & Setting up Environment**
- **Databases, Collections, and Documents**
- **CRUD Operations**
- **Queries & Filtering**
- **Operators (Comparison, Logical, Array)**
- **Indexes & Indexing Basics**
- **Data Modeling & Schema Design**
- **Integration with Node.js / Express.js**
- **Authentication & Authorization**
